

On June 30, 2015, a portion of individual liberty was officially lost with the stroke of the Governor's pen. We are a community of individuals who will continue to use our voices collectively to share the TRUTH of the dangers of liability-free pharmaceutical products and the corruption of those who create and mandate them.

### **WE BELIEVE:**

- ★ **The parents and doctors are better qualified than politicians to decide the course of medical treatments for our children.**
- ★ **Every child has a right to a public education. Denying education to a select few students is segregation and discrimination.**
- ★ **The Health Department has said we have the HIGHEST Vaccination Rates ever.**
- ★ **We are NOT in the midst of a health crisis.**
- ★ **Vaccine mandates will not end with children. Adults mandates and doctor's incentives are next.**

*(SB 792 & AB 1117)*
